kiara™

Full Spectrum CBD Oil 30%

Certificate of Analysis

At Kiara, we think reading lab results should be as easy as eating a CBD gummy. That's why we've created beautiful, easy-to-read reports anyone can understand, while still giving you full access to all the original lab results.

To access the original copy of a third-party report, simply scan the QR code of the report you'd like to view. If you have any questions, you can always reach us at **info@kiaranaturals.com**

Tests conducted by CBD Test, Bernstrasse 82, 8953 Dietikon, Switzerland.

Cannabinoid Profile & Potency	Result	Units
Cannabidiol (CBD)	31.50%	mg/g
Delta-9-Tetrahydrocannabinol (THC)	0.11%	mg/g
Cannabigerol (CBG)	1.90%	mg/g
Cannabichromene (CBC)	0.15%	mg/g
Cannabinol (CBN)**	ND	mg/g
Delta-8-Tetrahydrocannabinol (Δ8)**	ND	mg/g

Limit of quantification (LOQ) **< 0.05%-w/w
LOD < 0.02%-w/w (not reported) MU upon req.

How to read your lab results

Cannabinoids
A group of compounds naturally found in hemp. For example, CBD, CBG, CBN, CBC, THC, and hundreds of others. The cannabinoid test ensures that your bottle has the potency advertised on the label

Terpenes
Naturally occurring compounds found in plants, responsible for the aromas and flavors. Terpenes are believed to contribute to the effects of hemp, both alone and in combination with cannabinoids. This test shows you the name and level of each terpene present in your bottle.

Residual Solvents
Also known as volatile organic compounds (VOCs), these are FDA regulated solvents for dietary products that can cause harmful exposure for humans. These tests ensure levels are non-detectable.

Heavy Metals
A heavy metal test checks for abnormal levels of toxic or potentially harmful metals.

Certified Bio Swiss (Organic) Hemp
View Certificate here.

Heavy Metals Profile	Result	Units
Arsenic (As)	<0.1	mg/kg
Lead (Pb)	<0.1	mg/kg
Cadmium (Cd)	<0.1	mg/kg
Mercury (Hg)	<0.1	mg/kg
